HOAC® StarTrack.

Discover the new mobility.

HOAC® StarTrack, our extreme light fly bar made out of non welded Aluminium profil for heavy load capacity gives you more features on stage. The fly bar is designed for flying light, curtain and decoration on stage. The bottom chord adapts all standard suspensions.

Advantages

- > Light weight and sturdy Aluminium fly bar
- > Extruded profile for higher load compared to welded constructions
- > Easy fixing of Connection boxes, wire connectors, etc.
- > Integrated metric or inch scale
- > HOAC® carriage for horizontal move
- > Integration of curtain track
- > Other designs possible

HOAC® StarTrack | The profiles have a maximum length of 8 m. Connection of several profiles with our special connector set and seamless transition lengths up to 26 m and more can be achieved.

HOAC® StarTrack | Available in different sizes. Wire connectors, plug box or connection boxes can easily be fixed into the track in the upper chord with standard M10 nuts and bolts. The 60 mm bottom chord has an integrated curtain track.
